MAJOR PRIMARY TIMBER PROCESSING FACILITIES IN BRITISH COLUMBIA

1991

Economics and Trade Branch
Ministry of Forests
Victoria, B.C.

July, 1992

FOREWORD

This is the 1991 edition of the Ministry of Forests' *Major Timber Processing Facilities in British Columbia* and refers to operating timber processing facilities in the province which during 1991, used logs as their main source of wood raw material. Coverage of the industry does not, generally speaking, include re-manufacturing plants. Pulp and paper mills are the main exceptions.

Information regarding the timber processing facilities are from Ministry survey forms submitted by mills to Ministry of Forests' regional and district staff. Not all mills responded to the survey. Other sources of information include trade publications, directories and corporate annual reports. The cooperation of mill personnel who responded to the survey is gratefully acknowledged. A copy of this report is sent to the mills listed in this report.

Where a mill produces more than one product (e.g. lumber and plywood; lumber and paper), it will be listed in the respective sections of the report.

This report is updated annually and is available, upon request, to the general public. Any errors or omissions in this report should be communicated to:

Director
Economics and Trade Branch
Ministry of Forests

CHIP MILLS

(Listed Alphabetically)

Only mills producing wood chips as a primary product are listed in this report. All operating mills are listed:

1. Measurement units are bone dry units (bdu);

2. Per shift capacity is based on a continuous 8-hour work period;

3. Annual capacity is based on 480 shifts per year.

CHIP MILLS - 1991

MILL NO	NAME	LOCATION OF MILL	PRODUCT	FOR REG	FOR DIST	TSA	EST 8-HOUR OUTPUT CAPACITY (BDUs)	EST ANN OUTPUT CAPACITY (000 BDUs)
243	Cache Creek Woodchips	Cache Creek	CHP	K	31	30	550	264.0

240	Westar Timber	New Hazelton	CHP	PR	24	12	370	177.6

LOG HOMES MILLS

(Listed Alphabetically)

Only mills which are capable of processing logs to manufacture log homes are listed:

1. Measurement units are in pieces;

2. Per shift capacity is based on a continuous 8-hour work period;

3. Annual capacity is based on 240 shifts per year.

LOG HOMES MILLS - 1991

MILL NO	NAME	LOCATION OF MILL	PRODUCT	FOR REG	FOR DIST	TSA	EST 8-HOUR OUTPUT CAPACITY (PIECES)	EST ANN OUTPUT CAPACITY (000 PCs)

LUMBER MILLS

(Listed Alphabetically)

1. Measurements units are in foot-board measure (fbm);

2. Per shift capacity is based on a continuous 8-hour work period;

3. Annual capacity is based in 480 shifts per year;

There are two categories of lumber mills in this report:

1. Mills which produced more than 3 million foot-board measure (mill fbm) of lumber during the year;

2. Mills which produced less than 3 million foot-board measure (mill fbm) of lumber during the year.

PULP AND PAPER MILLS

(Listed Alphabetically)

All operating pulp and paper mills are listed in this report. For integrated mills, pulp capacity includes pulp which is used internally to produce paper and pulp which is shipped from the mill site as market pulp:

1. Measurement units are in metric tonnes;

2. Daily capacity is based on a working period of 24 hours;

3. Annual capacity based on 345 operating days.

SHAKE AND SHINGLE MILLS

(Listed Alphabetically)

1. Measurement units are in roofing squares (approximately 100 square feet);

2. Per shift capacity is based on an 8-hour continuous work period;

3. Annual capacity is based on 480 shifts per year.

There are two categories of shake and shingle mills in this report:

1. Mills which produced more than 10,000 squares of shake/shingle products during the year.

2. Mills which produced less than 10,000 squares of shake/shingle products during the year.

VENEER, PLYWOOD AND PANEL MILLS

(Listed Alphabetically)

All operating veneer and plywood mills which have primary log processing capability are listed in this report. For mills producing market veneer and plywood, veneer capacity includes both market veneer and the veneer which is used in plywood manufacture. Some panel mills which use wood residuals or which do not have primary log processing capability are also listed.

1. Measurement units are in square feet, 3/8" basis;

2. Per shift capacity is based on a continuous 8-hour work period;

3. Annual capacity for veneer mills is based on 480 shifts; for plywood mills and other panel mills, 720 shifts.
